Global Configuration of Jails

p { margin-bottom: 0.1in; direction: ltr; color: rgb(0, 0, 0); line-height: 120%; }p.western { font-family: "Times New Roman",serif; font-size: 12pt; }p.cjk { font-family: "Times New Roman",serif; font-size: 12pt; }p.ctl { font-family: "Times New Roman",serif; font-size: 12pt; }a:visited { color: rgb(128, 0, 128); }a.western:visited { }a.cjk:visited { }a.ctl:visited { }a:link { color: rgb(0, 0, 255); }

Before setting up any plugins on the server we must first configure the global settings for all Jails.

Go to the “Jails” page (1) and click on the “Configuration” button (2).

The screenshot shows a software interface with a top navigation bar containing icons for Account, System, Tasks, Network, Storage, Directory, Sharing, Services, Plugins, Jails (which is highlighted with a red circle and labeled '1'), Reporting, and Wizard. Below the navigation bar is a secondary menu with tabs: Jails (selected), Storage, Templates, and Configuration (which is also circled in red and labeled '2'). A large button labeled 'Add Jail' is visible. The main content area displays a table with columns: Jail, IPv4 Address, Autostart, and Status. A message at the top of the table says 'No entry has been found'.
