Configuring the BIOS

We now need to configure the BIOS of the server motherboard.

You can do this via a keyboard and monitor attached to the server or through IPMI as outlined in a previous section.

The settings and screen shots are all taken from a Supermicro X10SRH-CLN4F, but most are applicable to most server motherboards (I would imagine).

Getting Into Your BIOS

BIOS Settings

Quiet Boot

Watch Dog Function

AES-NI Encryption

AHCI SATA Configuration

IPMI Configuration

Boot Order Configuration
